Re: Children's Blended Case Management — Now Accepting Referrals

Dear Community Partner:

The Consortium, Inc. is pleased to share that our Children's Blended Case Management (CBCM) Program is accepting referrals. We welcome the opportunity to partner with your organization to connect eligible children, adolescents, and their families with individualized behavioral health and community-based support.

Our CBCM team specializes in connecting members from the age of 3 up to 21 to resources and supports in efforts to stabilize their behavior in the community. We have the unique opportunity to interface with members in all settings, including home, school and community! Our strengths-based services include individualized planning, coordination with treatment providers and schools, medical providers, advocacy, linkage to community resources, and ongoing monitoring to support stability. The program also provides access to crisis response support around the clock.

Children and adolescents who experience significant behavioral health challenges and need assistance coordinating services may be great candidates for CBCM services. The Consortium team is ready and able to work with referrals immediately and connect the family to needed resources with no wait list. Eligibility and medical necessity are determined through the applicable referral and review process.

To make a referral, please use the Children's Case Management Referral Form available through Department of Behavioral Health Services and Intellectual disAbility Services and contact our CBCM team for assistance with the process:

CBCM Referral Email: CBCMReferrals@consortium-inc.org

CBCM Program Phone: 215-220-6218

Referral resources: <https://dbhids.org/wp-content/uploads/2025/12/Childrens-Case-Management-Referral.pdf>

We appreciate your partnership and look forward to working together to help children and families access the services and support they need.

Sincerely,

Twiggy Rodriguez
